Warranty time	Support returns and exchanges
Payment term	T/T
FOB loading port	Qingdao China

Code	Spoke	Dish	Size
PM0162S	9	15°	13-1/2inch

Product Feature And Application

Marine steering wheels date back to ancient times, when they were first used on sailing ships. However, the specific history of Stainless Steel 13-1/2 Inch 9 Spoke Steering Wheel is relatively new. Stainless steel became popular for marine steering wheels in the mid-20th century because of its durability, corrosion resistance and stylish appearance. The 9-spoke design, with spokes evenly spaced from the center hub, is a classic and timeless design that is both functional and beautiful. Using stainless steel in Stainless Steel 13-1/2 Inch 9 Spoke Steering Wheel brings several advantages. First, stainless steel is highly resistant to salt water corrosion, making it an ideal material for marine environments. This ensures that the steering wheel remains in good condition even when exposed to adverse weather conditions. Additionally, the strength and sturdiness of stainless steel make it a reliable and long-lasting choice for steering wheels. It can withstand the rigors of driving a boat in a variety of conditions and is less prone to bending or breaking than other materials. Additionally, the smooth, polished stainless steel exterior adds a touch of elegance and sophistication to the boat's interior. It complements the overall aesthetic of the ship and is often associated with a modern and stylish look. The Stainless Steel 13-1/2 Inch 9 Spoke Steering Wheel design has been popular for many years and is widely used on different types of boats, from recreational boats to commercial boats. It has become an icon of rowing and is highly sought after by rowing enthusiasts. All in all, stainless steel nine-spoke steering wheels have a relatively short but significant history in the marine industry. Its stainless steel material, durability and classic design make it the first choice among boat owners worldwide.

Product Details

Stainless Steel 13-1/2 Inch 9 Spoke Steering Wheel usually have the following functions:

Material: Made of high-quality stainless steel, durable and corrosion-resistant in marine environment. Stainless steel ensures the steering wheel remains in good condition even when exposed to salt water and harsh weather conditions.

Design: 9-spoke design with spokes evenly spaced radiating from the center hub, providing a classic and timeless look. This design provides a balanced and symmetrical look while maintaining functionality.

Grip: The Stainless Steel 13-1/2 Inch 9 Spoke STEERING WHEEL is

designed to provide a comfortable, secure grip. It may have a textured or padded surface to enhance grip and reduce slipping, especially in wet conditions.

Sizes: Available in a variety of sizes to suit different types of boats and personal preferences. Common sizes range from 14 to 18 inches in diameter, but larger and smaller options are also available.

Installation: Typically designed to fit a ship's standard steering system, such as a traditional ship steering rudder. It may have a standard 3/4-inch tapered shaft with a keyway to ensure proper installation.

EASY TO USE: Stainless Steel 13-1/2 Inch 9 Spoke Steering Wheel is designed for smooth, easy steering, giving the boat operator precise control. It should spin smoothly and provide responsive feedback.

Aesthetics: Stainless steel construction gives the steering wheel a smooth, polished look that adds a touch of elegance to the boat's interior. It complements a variety of boat designs and styles, creating an overall visual appeal.
